Bass Coast Landcare Network farm walk- Monitoring your farm Dam Emissions.

You are invited to an exciting event to hear about Deakin Universities Blue Carbon Lab 'Monitoring your Farm Dam Emissions' project.

This citizen science project is working with farmers to monitor the health of farm dams. The program provides landowners with easy to install floating sensors that monitor in real time emissions such as carbon dioxide, methane and nitrous oxide.

Farm dams are essential to our thriving farms. They are more than just water reservoirs. Beyond providing reliable supplies of good-quality water, your dam can be a biodiversity hotspot and help reduce your carbon footprint, while unlocking financial opportunities. Come along to hear about this exciting program and how you might be able to get involved.

This event will commence with a presentation from Blue Carbon Lab followed by an interactive farm walk on a local Bass farm. We hope to see you all on the day.

Biosecurity measures will be in place on the day. Please ensure your vehicles and footwear are clean prior to this farm walk.

Event Details.	
Date:	Friday 17th May 2024.
Time:	1.30pm to 4.30pm
Farm address:	Event details will be forwarded onto you upon confirmation of attendance.

Please RSVP for this event by Monday 13th May 2024.

For further information and to confirm your attendance please email Joel Geoghegan on joel.geoghegan@basscoastlandcare.org.au or call on 0409 705 652.

This project is supported through funding from Melbourne Water in partnership with Bass Coast Landcare Network.
