

Pall Mall – Potential Road and Drainage Upgrade Project

Community Consultation – Feedback Summary

Project Description

A community initiated road and drainage upgrade project along Pall Mall in Ventnor has been initiated through a petition to Council. Community consultation was carried out to determine a preferred design that best reflects the views of property owners. This will assist with the further development of the project, including estimating costs and how they might be shared.

Method of Engagement

A letter and questionnaire were sent via registered post, and email when available, to the 46 property owners on Pall Mall, inviting them to share their thoughts on a potential road and drainage improvement project. Property owners were encouraged to select their preferred design features and provide feedback to help shape the design of the upgrade project.

Property owners were provided 4 weeks to provide feedback (1 June 2026 – 30 June 2026).

Results

Property owners provided feedback by returning questionnaires via email and post. In total, feedback was received from 39 property owners (85%) on Pall Mall. Results are shown on graphs provided. These results indicate a preference for road sealing only, with no drainage, footpath or traffic calming devices included.

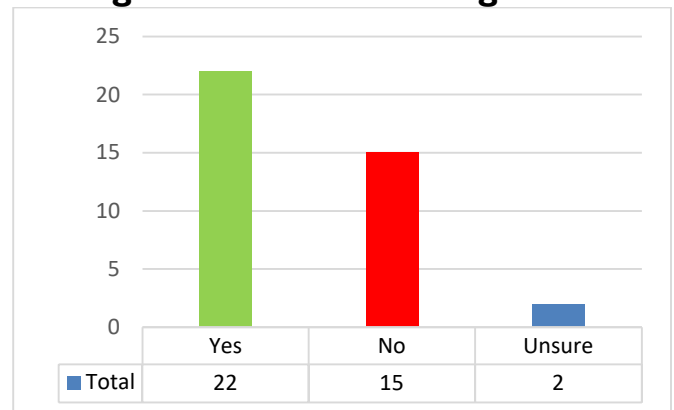

Next steps

Question 10 indicates that a majority of property owners support a proposed special charge scheme, however when considering Question 9 there is no clear majority support for any of the examples.

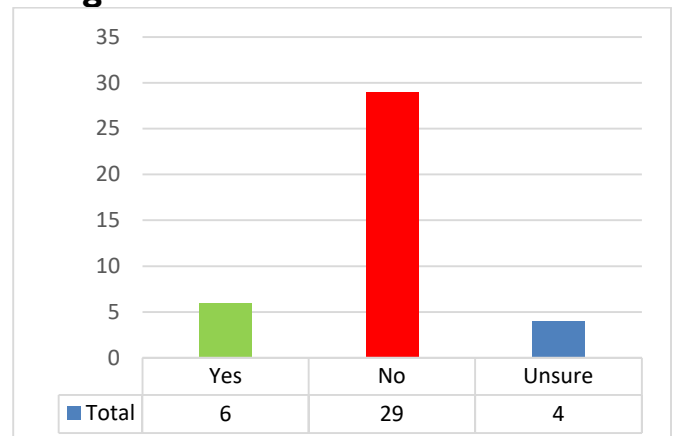

As Example 2 received the highest level of support, Council is now seeking further feedback specifically on whether property owners would support or not support the progression of the project based on this example.

If a clear majority is not in favour of this example, Council may decide not to progress further with a special charge scheme.

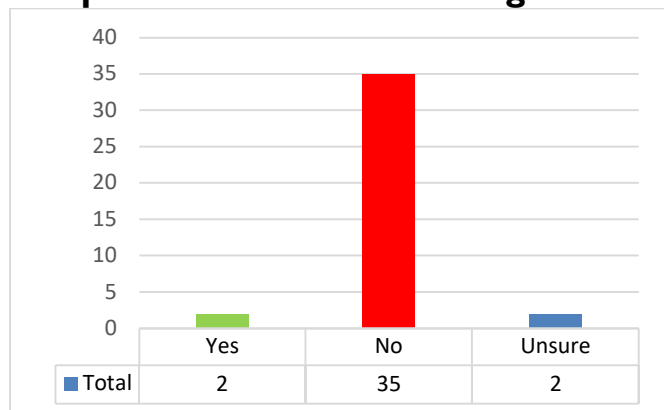

Question 1: Would you like road sealing included in the design?

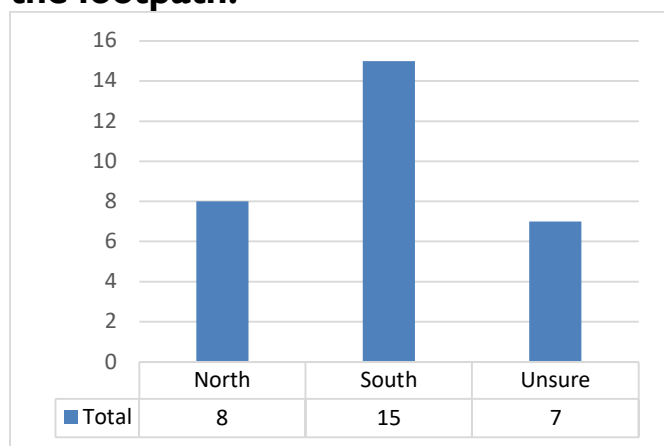

Question 2: Would you like underground drainage included in the design?

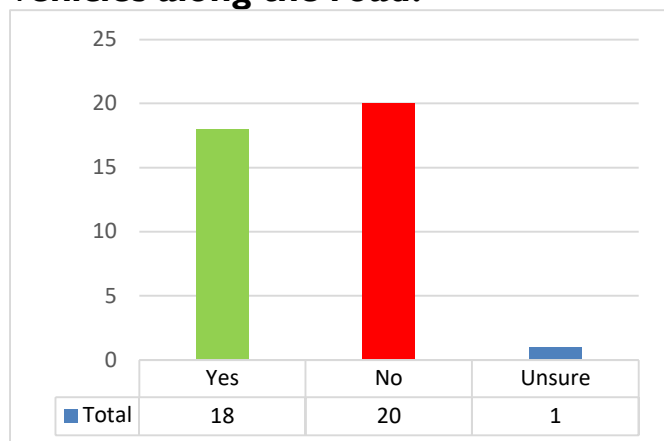

Question 3: Would you like a footpath included in the design?

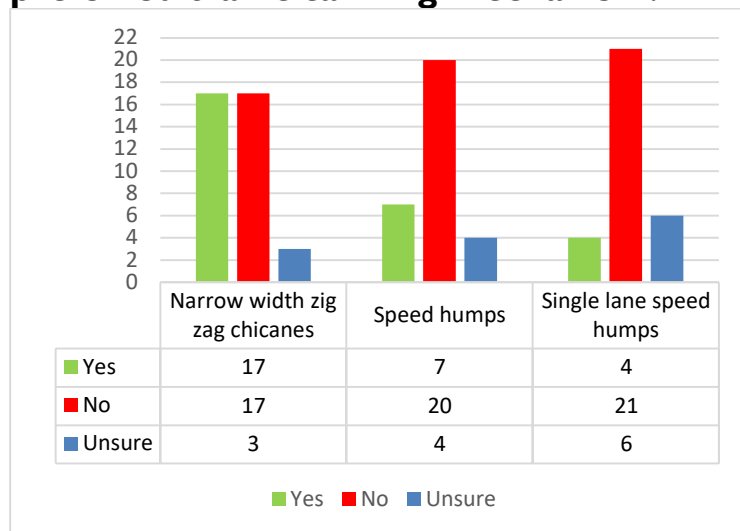

Question 4: If a footpath was installed, which side of the street would you like the footpath?

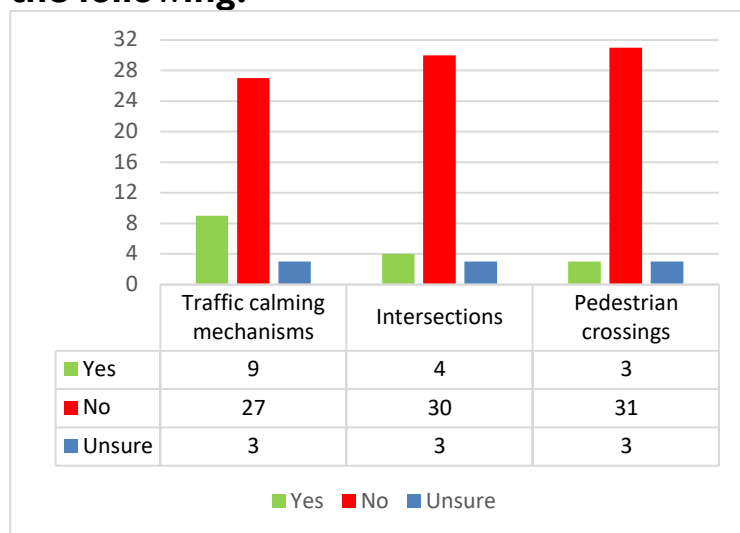

Question 5: Would you like traffic calming devices included to slow vehicles along the road?

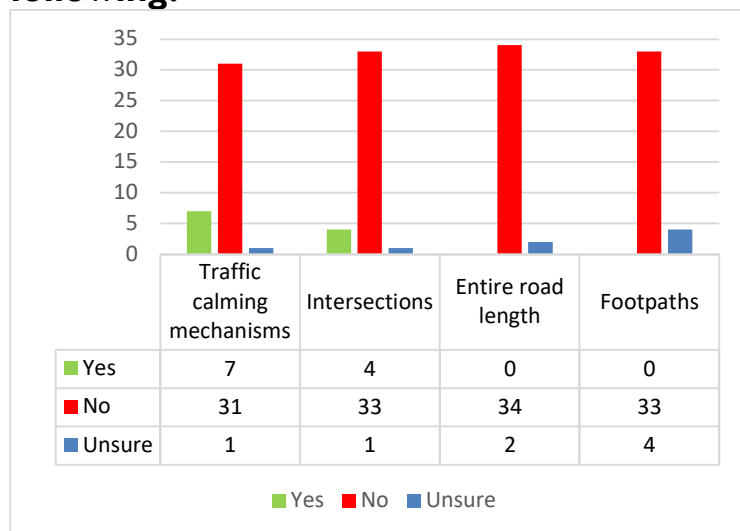

Question 6: If traffic calming was installed, what would be your preferred traffic calming mechanism?

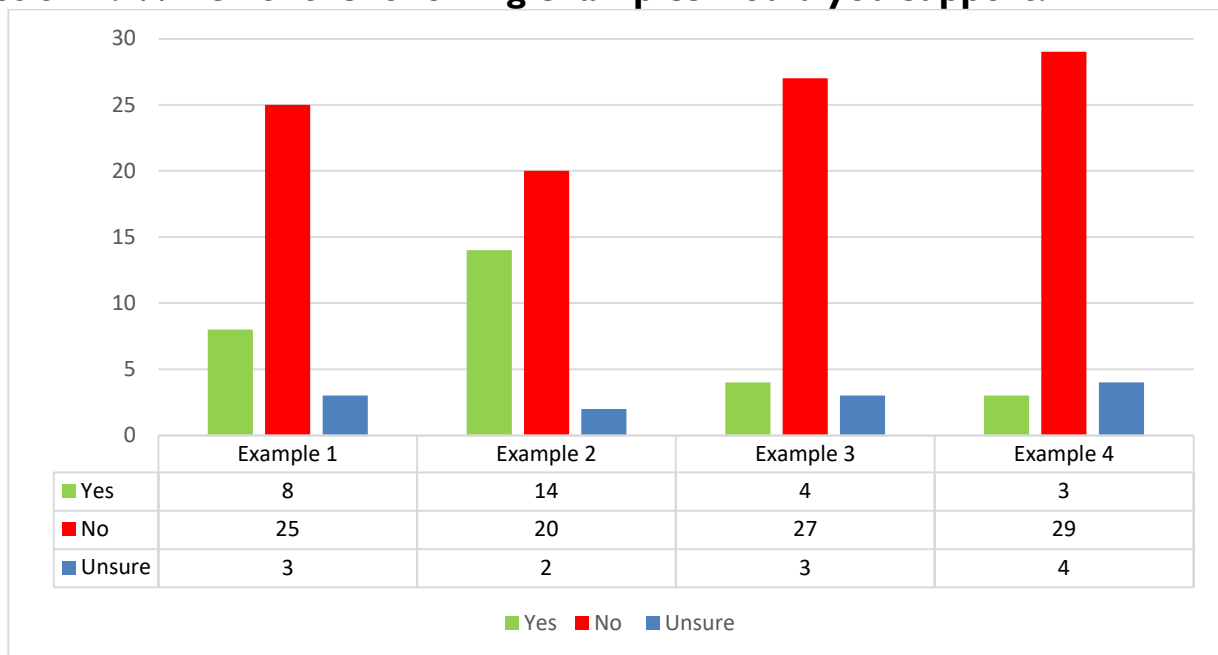

Question 7: Would you like additional landscaping, such as plants, at any of the following?

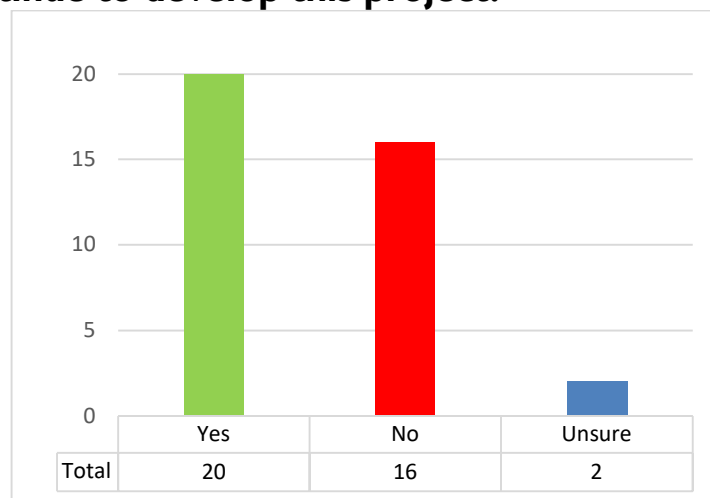

Question 8: Would you like to have coloured concrete at any of the following?

Question 9: Which of the following examples would you support?

Question 10: Given the cost associated with the proposed upgrade, would you like Council to continue to develop this project?
