Climate Change Action Plan Update: Council Priority Actions 2026–2030

Building a resilient, thriving, net zero Bass Coast

Council commits to achieving net zero emissions across its operations by 2030—and stands with the community of Bass Coast in striving for the same.

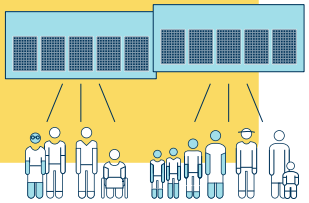

While Council has limited control over community-wide emissions, we champion a safe climate and a regenerative, resilient Bass Coast. Cutting emissions today protects the wellbeing of our community, now and for generations to come.

Our key action areas:

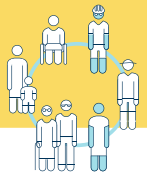

- **Energy Transition:**
  Optimise and expand local renewable energy and storage, helping cut emissions and cost, supporting a cleaner more reliable future

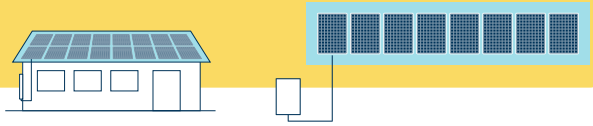

- **Community, Equity and Climate Justice:**
  Ensure no one is left behind, building on strategic partnerships to support a fair and equitable energy transition

- **Leadership and Governance:**
  Support our community to lead solutions, while advocating and partnering across federal, state and local government areas leveraging collective and collaborative action for impact

- **Adaptation, Risk and Resilience**
  Strengthen the capacity of both Council and our community to adapt to and prepare for current and future climate impacts

- **Land, Water and Nature:**
  Strengthen and scale nature-based solutions to draw down carbon while enhancing biodiversity and natural asset protection

- **Sustainable Transport:**
  Partner and advocate for holistic, sustainable transport solutions

- **Waste and Circular Economy:**
  Work with our community to reduce waste and support a circular, regenerative and resilient economy and food system

Council Priority Actions 2026–2030 align effort for impact to support a resilient, thriving, net zero Bass Coast.
