Comments:

1. Dimensions noted on plan are for guidance purposes only.
2. Where possible the works area is to have a 1.2 meter buffer between it and the passing traffic.
3. Remove or cover up existing signs that do no apply during works period
4. Working vehicles are to have a visible flashing light while in operation
5. All signage and traffic devices should be inspected immediately after installation to ensure local conditions are taken into account and that the traffic management plan is operating effectively and safely.
6. All traffic control devices must comply with the Road Management Act 2004, Worksite Safety – Traffic Management Code of Practice 2010 and Australian Standard AS 1742.3

Plan is to be read in conjunction with PMP/2A
